

CronaTech Drives AB

Info about CronaTech Drives AB

During 11 years sales and support of KEB drive system products in Sweden have been done by Thomas Crona, employed directly by the KEB head office in Germany. For to better handle KEB drive products on the Swedish and Norwegian market a new company was founded, CronaTech Drives AB. It will take care of sales, stock, support and service on the local markets.

CronaTech is up running since 1st of September 2014.

The biggest change is that we now also will work with end users and to do service and also have suitable products on stock.

We also support Finland and the Baltic states.

Karl E Brinkmann GmbH, Barntrup, www.keb.de

Manufacture automation products and drive systems

KEB Antriebstechnik GmbH, Schneeberg, www.keb-drive.de

Manufacture gears and servo motors

CronaTech's employees have many years of experience of drive systems from several different suppliers (frequency inverters, servo drives, dc-drives, motor, gears) in a wide range of applications like: paper machines, newspaper printing machines, woodworking, textile, pumps, air handling, elevators, electrical vehicles etc.

We can also supply customers with turnkey projects (including components from other suppliers than KEB). We have close cooperation with electrical panel designers, cabinet builders and automation engineers.

The CronaTech office is located on the island Hälsö, close to Sweden's second biggest town Göteborg, located in the South-West part of Sweden.
